Add SAUCERS

Feb 18, 1957

Si Newton came by this morning, after having spent a couple of days in Los Angeles. He had bumped into Harry Meyers, who invited him over to his house to meet Dick Miller, whom Si had never met. Si kept very quiet and let Miller talk. He was working on some electronic problems in connections with his work, his job, and Si asked him some questions. He opened up and started talking about his experiences with a saucer. He was working at a radio (electronic) shop and suddenly he heard on the 11 wave band (?) a voice coming through talking. He put a directional finder on it and all it pointed was up.- vertically. They by some instruments eliminated all the other short wave stations around, and still the directional finder just pointed up. The message the voice said was that if the hearer would like to see a space ship to go out on such and such a highway out of Ann Arbor, at 3 O'clock, and at one point he should wait. He was there on the suggested time, but nobody else was. He decided it was just a hoax anyway - he really hadn't put much home in it - when he was getting into his little pickup truck to go home. It was about 10 minutes past the appointed time. Then he saw the saucer hovering. It was circular, and the bottom was flat and smooth, and from under the saucer hung a ladder. He went up it and met a man standing at the top. This man was dressed all in white. He talked excellent English. He invited him in. They came into a circular room the edges of which had panels which evidently were partitions off to other rooms. He had no sensation of moving at all, except at one time there was a panel on the

In later years Marcus Loew and H. Clay Miner became interested in the owning and operating of a number of moving picture theatres and they remained fast friends until Loew's demise.

wall approximately 1½' by 1½' which showed a ball, which became larger until it looked the size of a basketball. On it he saw evidences of water and vegetation, and he asked what it was. The answer was "a planet." This was in color. But no further information was volunteered.

The whole time he was there which was 11 hours he had no sensation of hunger or fatigue. There were in all four or five people in the ship that he saw, coming and going, but the one in white was the only one he talked with. The others were dressed in other colors, but he was told that didn't necessarily mean any sign of rating, it just so happened.

This ship was manned by men from different planets, though the spokesman was from a planet outside of our solar system. they work,together out of Mars (?), to do research on magnetic faultings. He saw a corridor which had the appearance of being round, and felt that there was a series of circles around the saucer which were the main source of propulsion each circle being capable of a certain amount, like one would have the force to spin them through on the speed of light, the next one twice the speed of light. (How he got to this conclusion isn't clear. APS) At one time the man asked him if he would like to talk with his friends. He thought that would be nice. So he was tuned in and talked to them. Then he was asked would he like to see them. He said he would. So the man tuned in a screen, and there he saw his friends sitting around a radio set listening to him talk. He couldn 't hear them, but he could see them and figured he would have to say something to them to make them know he did see them. So he told them what they were doing, where they were sitting and what color shirts they had on. Then they told them that if they would like to see him come in they should be at this appointed

place at 2 o'clock, when he was due to land. They were there but didn't have much faith in the whole episode and since the saucer with Miller hadn't yet appeared they got in their car and took off. Miller landed just a few minutes afterward, didn't see his friends, so he went into his truck and started to drive off when they pulled up. They had gone down one road and decided to turn around and go the other one instead.

In LA he has been much with the Meyers. They live a few blocks apart. Mrs. Meyers tells how she herself bought a tape for their tape recorder. They played it once and it was clear, as new tapes are. Then they played it again and there were messages on it. Other tapes, in Miller's voice, have been recorded by his leaning back in a chair and they putting a mike on his chest. No talk. But the messages come out - in Miller's voice.

newspapers for inexperienced talent to participate in a "Professional try-out." (That sounded better than Amateur Night.) He said he would coach all who entered. Any one showing marked talent would be given a job with the show.

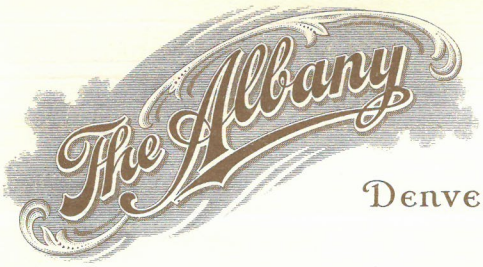
Dear Frank-

Your letters at hand and in this dreary waste spot of the world they are most welcome Just now, a gentle rain is falling - its a hesitant sort of rainfall, because 7 to 8 inches a year is about the limit in this Colo-Plateau land It may even get scared and take right off - so Im not going to say another word -

When I wrote the report on Denver I gave the bare situation

I have the Phoenix articles - the very same day in the same paper on front page a big Doodlebug story - with pictures - A steel magnates wife Mrs Smith had been kidnapped and held for $75000 ransom. She was out in the Superstition mtns, where you did all your "Last Dedotumans" mine yarn 30 years ago Herald man laid the dope on the line - She was released - days later they caught a guy wandering about dying from thirst they have him up as kidnaper, but he didnt have the dough - this doodlebug guy took some bills wrapped them about his long rod - Got the Sheriff and a car and away



they went - the money jumped at the bank as they left town, but they got out in the desert East of town and whann away to the Superstitions that rod went - they got the money & visit - every penny. hidden where it would have stayed until doomsday - Murders never cease, so they say -

---

I ordered a Transcript of all that was said in Judges Chambers and in the Court on the 14th Its ready now, waiting for me -

First - Lee were both found guilty by the Jury
Second - We gave notice of appeal -
Third - The Judge then sent us to Probation Dept.
Fourth - according to the law in Colo, so he told us we were to come before the Judge to be sentenced for the Crimes the jury said we had committed -

There was no sentence - It was not even mentioned -

We were called into Chambers, before court met -

The Judge began by questioning Mr Baker - My name was not mentioned - He brushed down the $250,000 swindle save himself as follows -

All over $2000. Hader spent on wells in Wyoming in his deals with Standard Oil Co. did not concern him -

But as to the $2000, he said -

The states cost $758 + or -, Mr McBaker will come out of the $3000 you are paying - Mr McBaker, Mr Hader paid you $28,500. That must be repaid -

Also Hader paid $1500 for an interest in the Newhall property - also he paid $49,400 for interest in Mojave Desert property - The Judge did not say to whom Hader paid this money - But the about statements are false (100%) The whole theory of restitution is to pay back what you got -

The Judge of course doesn't have the slightest idea as to what he meant or said -

Sim given 4 years 9 months to repay something

I never got - His is far from conspiracy to commit confidence game - which is a felony and punishable by a prison sentence -

Lawyers and others sitting in on the matter (my attys excluded) saw in this act of the Judge a chance for complete vindication on my part. DeBauer admitted his end - I did not - In fact I refused the offer of Probation on the grounds laid down by the Judge -

I later accepted part of the grounds, so that we could be free to proceed with our present plan -

Jim was released from Bond, as of yesterday For the first time a price has been put on his head -

No part of the $28,500 DeBauer admitted he got was ever even claimed to have gotten into my hands - The $49,400 was left in the air -

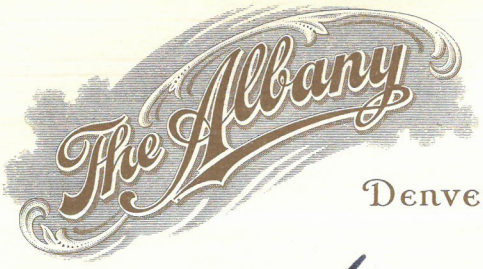
Once we audit the Newton Oil Co books - the Hader - N Oil Co contracts, and the expense money drawn by me from July 1949 - to Feb 1950 - and the shown the Newton Oil Co at all times had

Monday over and beyond the Hader monies - Then price money loses its identity once its in the company treasury - the Judge on his own premise will have to set aside his order - If he refuses then we have action appeal and otherwise - but think we are safeguarded at last -

Sue Hader? - We are actively via Newton Air Co, now getting papers underway to sue Hader from Hell to Breakfast, but we are going to sue the daylights out of DeBauer - Jim now free of DeBauers lawyers, and my brief lawyer Epstein, and have my personal and company atty on the job -

I have a lot of papers out there and may come there next 10 days to get them

In meantime working like hell here - looks good - mind clear - Frank Fast - On my way to better days for us all - Here's check #50 on the tiffing - keep any extra



DENVER

on our family acct.

My fine friend, I wrote down during magic hours all that yarn of mine—I candent stop to break up, edit sentences Once it's typed, that can and should be done. I already note endless minor errors— but the story is there—Sure Die take Harris to Washington & that I did so— Anyway its encouragin' to have you say you enjoyed it immensely—

As to the copy of my work, I believe in the short paragraph—and short sentences. Am sorry to learn Vallee is also guilty—I don't think it came out of Yale—It's as tho, I am talking, when I write and that's different in your case—Your trade is writing—You talk a lot different—

So long until tomorrow

Yours

THE TENNESSEE QUEEN
MINING COMPANY
URANIUM — VANADIUM

OFFICE OF
MANAGING DIRECTOR

July 31st [1954]

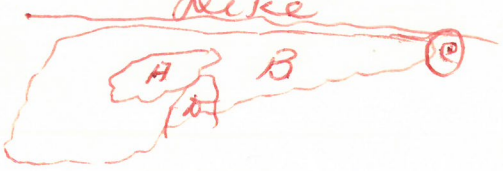
Dear Frank -

I was in Grand J. yesterday morning there had been a squib in the local paper announcing that Fry would talk - I went over to see the owner of the Sentinel - He and his wife went - Mrs Walker stayed to the letter end. Walker couldnt take it - He told me he had an hours talk with Fry, the day before the lecture - Said he was impressed with the man - and told him I would surely be present - But I didnt see the paper until 7:30 PM and I was a hundred miles a way - No saucer to ride in, so I didnt make it - The Walkers had seen the movie Welo made and I had briefed them on the whole saucer business. They are my very good friends, and are coming out Tomorrow, to spend the day and see The Tennessee Queen - from which we should start loading ore by the time you read this -

My story of this strike may be the biggest

Kring since they started the Steen build-
& found this property 4 miles from our
Yellow Cat operations. Studied it with my
instruments for over 30 days - The whole
Uranium fraternity had turned it down
even tho Madame Curie took 40 tons out of
the west shaft at 24 feet depth of 10% +.
Uranium - Next made 5 grams of Uranium
I have the chair she sat in - and have
it photographed for Smithsonian - A photograph
Wm H Lamb, 81 years old, famous Mining
Engineer whom she visited at Idaho Springs
in 1905 at one of his big mines, with
some problems -

I have uncovered our "roll" and it
is now exposed to the blue sky above -
It contains 2000 - 2500 tons of Ore - with
the bonus we drained get over $100,000 per it
5 feet below it is the next ore body. It is
surveys 150 x 70 x 6 - about 93,000 tons -
That is partially uncovered and will all
be ready when we load and the 2000 tons
It is shaped thusly



A is the 2000 tons

B is the 93000 tons - C is old shaft 30 ft deep - the side next to the outcrop has 6 ft of ore - some as high as 2% encountered the outside a mere trace - ore finished out. It was dug 50 years ago looking for copper - D - is the section where side of hill was opened and side drift of 6 feet into ore was cut - It had 6 ft wall of ore. No copper except stains - So when my depth measurements were verified when we put ladder in old shaft and climbed down. I figured my outline surveys measurements to be O.K. The assays verified my checks. See all uncovered was exactly as I outlined it - If the B section is as surveyed, will load over #2,000,000 of ore into trucks in 3 to 5 months - will that be a story - People are coming to the operation every day - as I walk down the Moabs main Boom street people stop me to ask about the strike - I say, well it looks fair" We have 600 acres surrounding this claim - so no one can get close -

So we shall see how the old luck runs. All my life when it starts my way, its a flood— How do you like the name— "The Tennessee Queen"? Figure it out—

I haven't told Sharon anything except to say we are making real progress. This is the first report of actual operations to anyone— England are paper reports by boys talk, and Uranium report same day same paper— Pass all this on to Gene—

And now for a hot one— The La Sal Mts 3 big 11,000 ft peaks are young and when they rose they uplifted the whole country and made the Colorado Plateau— 3 or 4 major faults resulted 30 to 5 miles long— Uplifted at flanks one fault for 25 miles, and our Tennessee Queen is in this major fault— I began with 3 other men to explore the length of this great fault about 10 days ago; All of a sudden— I said Stop the car, there's a magnetic vortex— They had heard the vortex story— They are Geologists and Mining

experts - So I shot this Vortex a mile away - It was an alternating vortex about ½ mile from it was another, It turned out to be a Direct current vortex - We traveled over 15 miles along the fault area - Have found 5 all told - Homer and Sunday, the Walkers are coming for the day to see the mine work and the Vortex phenomena - Walked made 3 trips down the San Juan & Colorado Rapids in flat bottom boat. So he's an explorer on his record - Have we found something new under the sun in these Vortex's - Are the common to major fault areas? We shall see - I shall dedicate some money out of our operations to this research and let Gene head the research - He already had done heroic work out there -

Thursday night Muddy face - a grand old Bulldog - Howards get ment out to take a leak - Some murderer killed his

friendly kindly old dog. He protected Howard as his duty - they buried him in his sleeping blanket to avoid tears, yesterday - Here on this vicious jungle on his old trembled mud ball -

So ends this epistle - I hope to head your baby next Friday, but will advise - Love to all

Ric

June 17 2

Dear Frank-

Just to let you know they made a new switch on this Criminal Felony Farce that's been playing the Denver District court longer than McCarthy has been confusing the public-

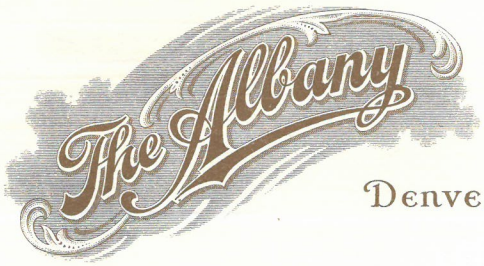
The Judge called every one into chambers, and announced upon his opening gun that he felt very strongly that this was a case for probation and restitution - Doc ordered and paid for a copy of the entire proceedings in chambers and in the court-

There was and is no sentence to prison - In fact the subject was not mentioned-

The Judge said the D.A. department

Suit broken down to $50,000,
which of course has been a heavy
paper headache, and he wanted
to know if Hilbaum if he could
pay the States expense about $3000
Lee's lawyer said yes at once
in a few days — They settled in
10 days — Then he said Hader
send you $8,500 can you pay
that back "Will in time" — Then
he said Here 1500 — and 49 to
Hader paid for interest in property
in Needham and Wayne Co. He
didn't pay who too — So Hilbaum
and his lawyer wrangled about
time — so they let in Oct 1st

As a starting point 15% of this
income 1st year 20% 2nd 25%
3rd and thereafter – at end of 4 years
9 months give Hales a note
for balance and to be paid
each year thereafter equal to
any amt paid last 3 quarters of
last year – All agreed –
Then next that all done they
came to me – and my atty
announced "I had no money, and
I proposed to carry my case to
Supreme Court on appeal – The
Judge said well that settles
that – The place runs in an



upon me with deadly silence
then I confronted by request
the statement -

"Next move my attys brought
suit a friendly suit into a long
huddle - he decided that since
this was a collection agency case
as to money paid me - which
there was none - we would
accede to Courts decision - Get a
C.P.A firm audit the whole
money end - Report audit with
a complete review and show
court by Certified audits that I
never received a penny of any

Kind. He Bauer admits he got
Money - Then we will go before
Court and show Judge Lindsey
of his course, and that Dills
Dept had deceived him. This is
the first break down of money and
the claims by the Judge that Jay
has and all is well -

So Buchanan atty says - Dills
Judge Dill agree to 1/3 of income
beginning Oct 1st the income to
Jay, and 20 & 25 etc - The
Judge then made his rulings &
announced his ruling -

Lawyers all over Denver where
a buzzin - Nobody ever heard

DENVER

of such doings - But there you are - My fight now is to get the Judge the certified facts on the theory he will dismiss as against me - At times I for more years of court fighting $10,000 of expense and always the chance of losing stuck - But the last, last will vindicate me - My bond is discharged by June 15th

More next Time

Yours

Epstein is coming Calif on vacation - may call upon - He asked for your ad -

The Albany

Denver

Sunday June 27 [illegible]

Dear Frank.

First here's the check that wasn't in yesterdays letter - I wonder if the typist if not already finished cared use second sheets that would give a little better imprint -

I notice she doesn't believe in Capital letters - Where did you get this idea they don't belong -

Whatever you do re the Saucer book is OK by me -

Since you've read the draft of the last section sent you, I'm sure you need must do a lot of boning and turning on a lot of the scientific dope there -

I have all my tape recordings in L.A. will dig them up when I come out. Had our tape recorder - Sharon went by 2 weeks late - they swore they didn't know where it was. $45 for $200 Machine

Our allys have already commenced war on the devils against Hader and Reburn - My associates in this Uranium deal are

The Albany
Denver

fully aware of all the facts and are backing me in my program -

I have to go to Tulsa to get Rebelin to work on the carrying audit - on Flader deals July 49 to Feb 1950 -

Then we have to employ C.P.A. from Denver to examine the entire case, all the contracts, make audits, make analysis report of the contracts, what was done - and who got the money, my connection with the Newton Oil Co, my interest in same, the stockholding record - In fact make a report will show, what never appeared on the trial, because the Newton Oil Co was not on trial, but the Judge has brought them into it because of the money angle -

Gene has some of my books - He'll see about the Tesla book when I come out - I want to pick up my bags and baggage you have so kindly cared for during the long months -

3

The Albany

Denver

Gene has sent me complete copy of Frye's book - all this stuff - Frye - Van Dassell - Bellevue. Adamski is so much science - fiction crap that its funny - and this secret <u>one</u> man contact business leaves me cold -

Sin here in the best spot on earth for them to alight and see me - but two days - Sin waiting -

There may be appeal - But the program is for 100% vindication -

Best of everything

Dr

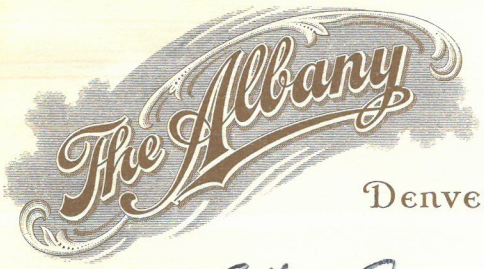
Tuesday June 29th

Dear Frank -

Your mentioned that Butler gave you the story in the Phoenix paper -

There two - are the AP story, garbled as usual - The Judge made no such statement The Post asked me for one and with DeBacon Hader and the attys all in Court I said sure He give you a statement so you can put your usual $250,000 swindle lying paragraph in it as a head - You just save the Judge knock $170,000 of your yarn for a loss - write that in your paper and as for those two lying thieving crooks standing there, (and I pointed to Hader & DeBacon) See my book they are a pair of a kind. and what's more their day is coming - My position is exactly as it's always been - I want a party to this deal - and I haven't changed one iota!" That was that -

The second story is 1st & 2nd page with pictures - A doodle bug framed the money



just like Carr - Paul Beamer Jimmy Baker and I did when we took off across the desert to look for the home of that chunk of gold ore -

If this Uranium comes to pass and it looks like it will - I'm going to dig that good and silver up - for free down at that old mission east of Riverside on the way to Palomar - and will let the Press have that perforated by the Fathers at the mission - I'm going to have a lot to say to the oil fraternity one of these days, about Doodlebug oil finding - Yours would be surprised at the actual provable record on that score - It beats the 8 to 1 shots of the geologists and geophysicists all hollard -

The next 3 months will be about the busiest time ever had - We have all those lawsuits of the Company against Baker

to prepare and file - There will be two or three of them, aggregating about 20 million dollars -

Then there will be two important suits against DeBauer - and we are thinking very strongly of a Federal prosecution against him -

Next, there is audits from our Tulsa Tax & CPA firm, and a CPA firm in Denver, and the preparation of motions to present at this Judge arising out of this finding and ruling - Our next moving three important legal fights are here armed with them and this case - and by the way what ever happened to Brigham Rose?

Guard these two papers with your life. There is meat in them -

Best of every thing

I want to get that many about 12 to 15 I hope it will work out
